

AMENDMENT TO THE SPECIFICATION:

Please amend the paragraph on page 29, line 21 through page 30, line 4 as follows:

In Figs. 5A to 5C, when the power is turned on (step S211), the Internet connector 105 connects to a portal site of streaming contents designated in advance, and receives metainformation related to the streaming contents registered in the portal site (step S212). The metainformation is stored in the ~~metainformation~~ metainformation memory 108 (step S213). This process is substantially the same as that of the above-mentioned embodiment. However, in this embodiment, this process is performed while a user is not audiovisually enjoying streaming contents.
